EDUCATION

Bachelor of Engineering Computer Science and Engineering Chennai Institute of Technology	CGPA : 9.1 2022 - 2026
---	---------------------------

INTERNSHIP EXPERIENCE

DevRev- Applied Artificial intelligence Engineer Intern Worked at DevRev focusing on automating repetitive workflows using Claude-based plugins, prompt engineering, schema analysis, and API integrations through Postman. Handled end-to-end enterprise customer requirements, including workflow customization, UI-related enhancements, issue debugging, and solution delivery for clients such as Paytm and Bajaj.	Oct 2025- June 2026
Altruisty- Web Development Intern Developed the company’s official website using React.js, focusing on responsive design, performance optimization, user-friendly interfaces. Collaborated with the development team to enhance website functionality, implement client requirements, and manage code efficiently using GitHub.	May 2024 - June 2024
CognoRise- FullStack Web Development Intern Transitioned into full-stack development by building Single Page Applications using HTML, CSS, and JavaScript. Gained hands-on experience with backend concepts and database integration, which deepened my understanding of full web application functionality from both client and server perspectives.	June 2024 - July 2024

PROJECTS

AI-Powered Digital Judiciary System Developed an AI-powered judicial case management system using React.js, FastAPI, and MongoDB. Implemented secure role-based dashboards and REST APIs with JWT authentication. Integrated BERT, T5, Hugging Face Transformers, and spaCy for legal AI assistance and case summarization.
Smart Expense Tracker Designed an interactive expense tracking website with React for a smooth and efficient user experience. Implemented real-time updates, expense categorization, and data visualization for financial insights.
Real-Time Chat Website Developed a real-time chat application using MERN stack for seamless, secure, efficient communication. Integrated JWT authentication and WebSockets for real-time, fast, and low-latency messaging experience.

TECHNICAL SKILLS

Programming languages: Python ,Java, JavaScript, Typescript. Web Technologies: HTML, CSS, JS, JSON, REST API Database: MySQL, MongoDB, PostgreSQL, SQLite Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS ,Bootstrap	AI / NLP Tools: Prompt Engineering, Claude AI Plugins, Hugging Face Transformers, BERT, T5 Tools & Platforms: Git, GitHub,Docker, VS Code, Eclipse,Cursor,Claude API & Integration Tools: Postman, Webhooks, API Testing, JWT Authentication
--	---

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) Deep Learning, Introduction to IoT, and LLM – NPTEL Web Development Bootcamp – Udemy	365 Data Science Platform Certificate Certified AWS and IBM Courses – Coursera

ACHIEVEMENTS & VOLUNTEERING

NASSCOM Competition (2024): Finalist with the HVL_CODERS team, recognized for innovative problem-solving, software scalability, practical implementation strategies, efficient code optimization, and real-world applicability. IEEE Conference Paper: Conducted performance analysis of YOLO models for strawberry detection (IEEE Link) achieved 92% accuracy in YOLO-based strawberry classification, enhancing object detection under low-light conditions. Coding Platforms: Continuously developing my skills in datastructures, algorithms, and problem-solving, currently ranked in the top 8.23% globally on LeetCode, with a global LeetCode rank of 28,624. Volunteering: Organized technical events like Pair Programming, Hackathons and Technical Quiz during my college's annual Hackerz Symposium. Planned, coordinated, and promoted workshops.
